

Technical Bulletin

Product: Thermocube and Oasis, all Models

DESCRIPTION:

TB#: 1024

RECOMMENDED COOLANTS

DATE: Updated 7/12/13

This Upgrade Requires Tracking Yes No

DISCUSSION:

Solid State Cooling Systems has evaluated various coolants for use in its Thermocube, Thermorack, and Oasis products lines and has found one off-the-shelf, non-toxic, coolant ideal for preventing algae growth and corrosion while still providing excellent heat transfer performance and extending pump life.

We recommend using a pre-mixed propylene glycol/water based coolant from Koolance. Though it comes in several colors, SSCS recommends the colorless or blue versions in 700 ml bottles, part number: LIQ-702CL-B (clear) or LIQ-702B-B (blue), as the dyes in the other colored versions can form small particulates when not well mixed.
